

# Quick Questions

## Get Started

Each player tosses two number cubes.  
If your numbers match another player's numbers, toss again.  
Decide who will read the first question. Take turns.

## For Each Question

Listen to the reader. Discuss and agree on the correct answer.  
Every player who has that answer can remove one cube that shows the answer.

## How to Win

The first player who removes both cubes wins. Have fun!

a	100 years is how many centuries?
b	21 days is how many weeks?
