

# Quick Questions

## Get Started

Each player tosses two number cubes.

If your numbers match another player's numbers, toss again.

Decide who will read the first question. Take turns.

## For Each Question

Listen to the reader. Discuss and agree on the correct answer.

Every player who has that answer can remove one cube that shows the answer.

## How to Win

The first player who removes both cubes wins. Have fun!

a	61 years is how many more years than 6 decades?
b	76 hours is how many more hours than 3 days?
